SUP R3 Epita 2026

28 Mai 2022

1 Installation

To install the game, download the file WhisphuntersSetup.exe on our website and launch it. Once launched, simply follow the steps displayed on the screen that will guide you through the installation process.

2 How to play ?

2.1 The menu

The first you will launch the game, you will be asked to enter a username. You are advised not to use your real name. Other players will recognize you in the game by that name.

The first in-game menu itself has three buttons :

- The **Quit** button, to close the game.
- The **Credits** button, to show credits at the bottom of the screen.
- The **Play** button, to start playing.

Once clicked, you will be shown a different menu with three new buttons :

- The **Back** button, to return to the previous menu.
- The **Join** button, you will be required to enter a 4-digits code in order to activate the button with the **Enter Key** and join a Room.
- The **Host** button, which will create a new Room and enter the **lobby**.

2.2 The lobby

You are now in the lobby.

In the upper right corner, there is the room-code. Other player are needed to enter this specific code in the **Join** button to join your lobby.

While you are waiting for your friends to join you, you can select a character by clicking one on the screen. There are five playable characters.

Once a character is clicked, the screen will focus on them. If you want to select that character, you can press the button at the bottom of the screen **Choose <Character Name>**, you will then need to decide on a **Specialisation**. When you're done or if you changed your mind, you can go back to the main interface with the **Back** button.

Each character has their own specialisations.

You can still select another character after selecting one.

Then, you can select your equipment. There is a button in the bottom right corner which shows a menu divided in two parts :

- **The shop** part, where you can buy items with the green **Buy** button. There is a number for each object showing you how many of them you own and how much each item costs. You can click an item to equip it.
- **The equipped** part, showing you which items you are taking with you during the incoming game.

If you are not the host of the Room, you can press the **Ready** button and wait for the host to start the game.

If you are the host, you can press the **Start** button to begin the game. This will only work if every player in the room is ready.

2.3 The Game

You are now in the game. You can control your character with the **Z, Q, S, D** keys.

- The **Z** key, to go forward.
- The **Q** key, to go left.
- The **S** key, to go backward.
- The **D** key, to go right.

You can also jump with **Spacebar** and sprint by holding the **left shift** key. Be careful, you can't sprint forever, once exhausted, you will be slowed down for a short period of time.

Your inventory is represented by a horizontal bar at the bottom of the screen. In order to hold a specific item, you have to press the number associated with it (Press **1** to select the first item in your inventory).

You can press **T** to activate special abilities. These will differ from a character to another.

Good luck for your hunt !
